EBAA Launches First Dedicated Emergency Response Planning Workshop

Brussels, Belgium – 6 August 2010 – The European Business Aviation Association (EBAA) is announcing the launch of its first EBAA Emergency Response Planning (ERP) Workshop to be held in Brussels, Belgium on 9, 10 September 2010. EBAA invites all interested business aircraft operators to participate.

The workshop will provide operators with guidance on what is required in the aftermath of a major incident or accident. Aligned with the recently released EBAA Emergency Response Guidance Manual, developed by EBAA and Gates Aviation LLP, together with members of an internationally-based ERP Steering Group, the workshop is laid out in three sections:

SECTION 1 - ERP Basic Principles
SECTION 2 - ERP General Guidance
SECTION 3 - ERP Framework

“At the end of the workshop, business aircraft operators will not only have learned what is required of them in respect of emergency response planning but participants should also walk away with an actual draft plan written around their business needs,” explains Brian Humphries, President and CEO, European Business Aviation Association.

Interested operators can contact the EBAA Secretariat at + 32 2 766 00 70 or info@ebaa.org to order their ERP Guidance Manual and register for the workshop.

For more details about the workshop, ERP Guidance Manual or ERP requirements and recommendations, please contact EBAA President and CEO Brian Humphries at + 32 2 766 0070 or info@ebaa.org.

For Editors:

EBAA

The European Business Aviation Association (EBAA) was founded in 1977 to defend the interests of business aviation. Today, more than 500 business aviation companies (direct members or members of associate organisations) rely on the EBAA to protect their business interests. It is the only voice to represent business aviation among the European institutions. For more information, visit www.ebaa.org.
