

BUSINESS AVIATION

TRAFFIC TRACKER EUROPE

May 2020

COVID-19 Edition

May 2020 – Foreword

The European Business Aviation Association (EBAA) is actively and closely monitoring developments related to the COVID-19 outbreak. We work with European and global authorities, and other aviation organisations, to gather, filter and disseminate official guidance and information to our members, and the broader industry as it becomes available. In this report, we have compiled European Business aviation traffic data and trends for the month of May 2020 ([see the April 2020 report here](#)).

Continuing the effects of the global COVID-19 crisis on the aviation industry which started mid-March, **May 2020 shows a 62% decrease in traffic compared to 2019**. However European Business aviation seems to experience a slight upturn in activity towards the final week of May. The trend is observed in all major European Business aviation markets; Switzerland, France, Italy, Germany and the UK.

Early signs of recovery:

- With airlines operating at only 10% of their regular activity, **Business aviation accounts now for 1 out of 4 airplanes** flying in Europe (the largest market share ever recorded for Business aviation).
- Business aviation seems to be the first to emerge and **facilitate the restart of the air transport system in Europe**.
- Chartered aviation is driving demand in the market and there are indications this trend will continue.

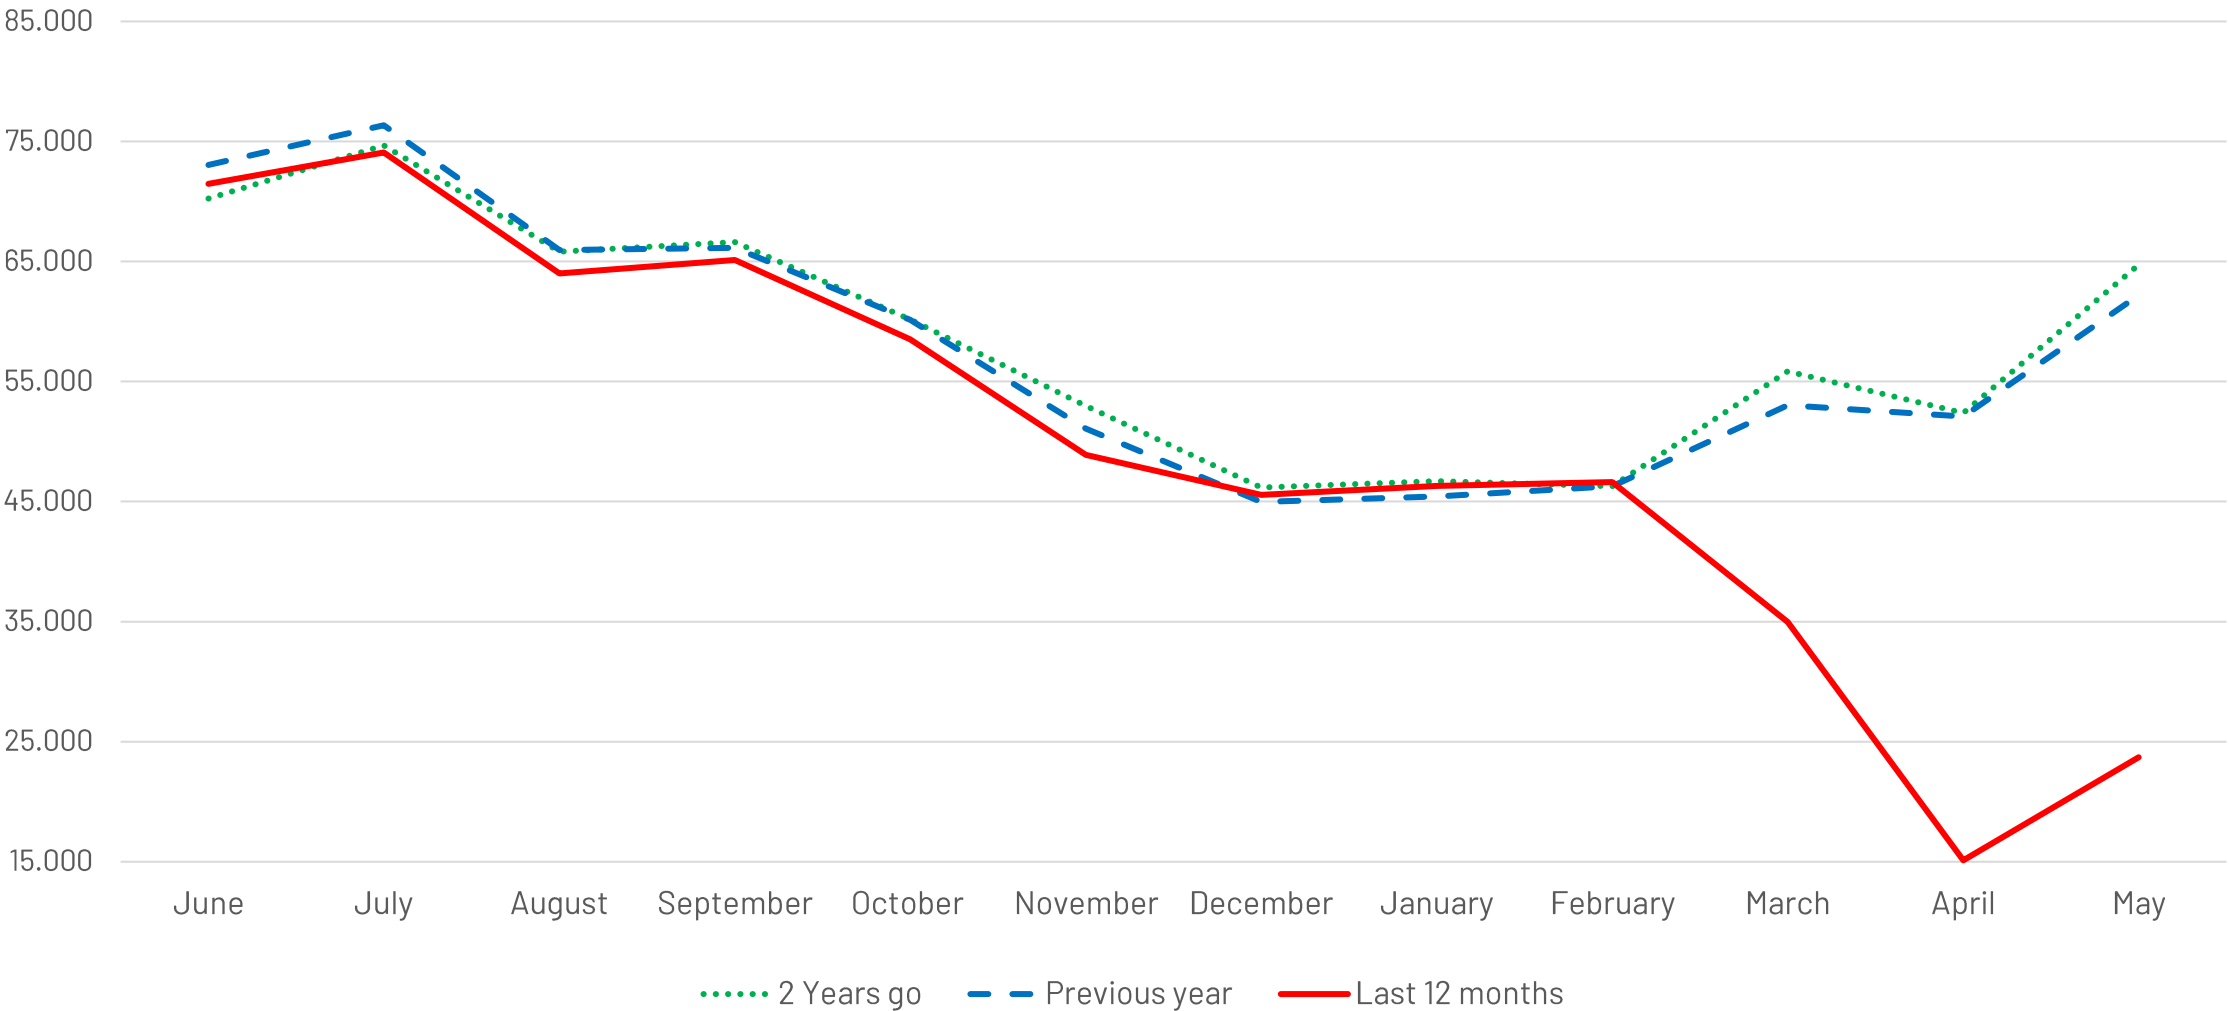

During the outbreak of COVID-19, Business aviation played a crucial role with many operators specialised in medical and emergency flights are having provided essential services to communities fighting the pandemic, including for the transport of health workers. For more information, [read our stories](#) on what's been going on behind the scenes.

This traffic report is made possible thanks to [EUROCONTROL](#) data and the support of [WingX](#). On the following pages, you can find detailed information on European business aviation traffic, in a geographic and weekly breakdown. Should you have any questions on this report, please write to Arthur (athomas@ebaa.org).
